

PhD Translational Fellowships

Get the knowledge, experience, network, and funding necessary to start commercializing your research!

PhD Translational Fellowships equips PhD students interested in entrepreneurship with the tools needed to go from idea to real impact within the health technology field. You will develop practical skills to generate innovative solutions for the improvement of health and health care while broadening your network and receiving funding to take your idea to the next level.

LOCATION | 6TH MAY 2019

www.eithealth.eu

EIT Health is supported by the EIT,
a body of the European Union

1 Program overview

The program is a pan-European initiative sponsored by EIT Health which aims to give you a solid foundation to start planning an entrepreneurial venture based on a research topic of your interest. As a program participant you receive coaching and training throughout the process and are introduced to the challenges of innovating in health care and ways in which to overcome those challenges. Experienced instructors from some of Europe's leading institutions on health care innovation will guide you through topics such as market need identification and validation; solution concept generation and validation; how to navigate intellectual property, regulatory, and reimbursement complexities; and business development.

During the training camp you will get the opportunity to network with likeminded PhD students from the following partnering universities, and more:

- Karolinska Institutet
- Sorbonne Université
- Universidade de Coimbra
- Université Grenoble Alpes
- University of Oxford
- Universität zu Köln
- Leiden University Medical Center

If selected, you will receive a **1,500 EUR travel & Accommodation grant** to participate in the Training Camp at the University of Oxford on August 5-16. During the training camp you will engage in lectures, workshop, and networking activities and the camp will conclude with a pitch competition where the winners will receive **prizes of up to 3,000 € in six prize categories**.

At the end of the program, you will have a clear understanding of the requirements for building and de-risking an entrepreneurial venture within the health sector.

2 Application process

In order to be eligible to apply you need to:

- ...currently be enrolled as a PhD student at a university/institution in Europe
- ...have finished your 1st year PhD
- ...be researching a topic related to health or health care
- ...be able to attend the whole training camp in Oxford, UK on August 5-16

The following material is needed for your application:

- Personal CV
- Personal letter of motivation
- Letter of recommendation/supporting letter from PI
- Written pitch of your idea (maximum 1200 characters)

- Description of how you will invest a potential prize to further develop your idea
- A video of your pitch (maximum 3 minutes)

Submit your application no later than **23:59 CEST on Sunday, June 9th** through the link below:

<https://eithealth.wufoo.com/forms/mcwt6qy04rk5eq/>

The jury will evaluate each pitch according to the following criteria:

- Quality of Science
- Idea or Proposition
- Innovation's fit to market need
- Innovation Plan Roadmap
- Presentation

On the following link, you can find some valuable pointers about pitching:

3 Contact information

Questions relating to this call for proposals should be directed to the following contact:

Jorge Figueira – University of Coimbra (dits@uc.pt)

4 Training Camp & Final Pitch Competition

Only the Local pitch awardees will have the opportunity to attend the two week training camp in Oxford (5th to 16th August). At the final day of the program there will be a final pitch competition, where a EITHealth jury will assess the 10 min pitches according to the same above mentioned criteria to select awards for the best candidates up to six categories up to 3.000€ per category.
